

MINIATURE MOULDED PART – 202K111

The miniature heat-shrinkable moulded part shown alongside our previous smallest 'K' part 202K121, is designed to fit the smaller circular connectors and provide effective protection and strain relief.

This is manufactured in a choice of materials, with the option of an adhesive lining for environmental sealing, this moulded part is compatible with the requirements of a wide range of applications in the commercial, industrial, autosport and communications markets.

The new miniature moulded part has a wide operating temperature ranging from –55 degrees C to 200 degrees C and is installed by heat-shrinking over leads and connectors to apply permanent strain relief to wires down to 2.1mm diameter. It is lightweight, yet rugged, and provides durable high integrity protection in applications as diverse as audio equipment connectors and the AS style connectors used in autosport.
