

FE CONNECTOR

Connectors for FFC

The FE connector ensures easy, secure connection of flexible flat cables (FFC). This compact connector is 4.8mm (.189") wide, 7.5mm (.295") high, and provides high contact pressure even though little force is required for insertion. The result is smooth insertion and reliable contact performance. The connector is useful in making personal computers, VCRs and car stereo systems smaller and lighter.

Features

- **Low insertion force and high contact pressure**

FFC leads can be inserted with little spring force, yet the contact pressure is high once they are inserted.

- **Snap-in connection**

FFC leads are secured after being gently inserted in the connector.

- **Temporary board retention feature**

The contact's solder dip section has a retention mechanism that allows the connector to be temporarily mounted on the printed circuit board and prevents the connector from floating when soldered.

Specifications

- Current rating: 1.0A AC, DC
- Voltage rating: 200V AC, DC
- Temperature range: -25°C to +85°C
(including temperature rise in applying electrical current)
- Contact resistance: Initial value/20m Ω max.
After environmental testing/30m Ω max.
- Insulation resistance: 1,000M Ω min.
- Withstanding voltage: 500V AC/minute
- Applicable FFC: Lead pitch/1.25mm (.049")
Lead width/0.8mm (.031")
Mating part thickness/
0.3±0.05mm (.012" ±.002")

<Note>FFC to be actually used should be checked for applicability.

- Applicable PC board thickness: 1.2 to 1.6mm (.047" to .063")
- * Contact JST if Lead-Free product is required.
- * Refer to "General Instruction and Notice when using Terminals and Connectors" at the end of this catalog.
- * Contact JST for details.

Material and Finish

Contact: Copper alloy, tin-plated
Housing: PBT, UL94V-0, white

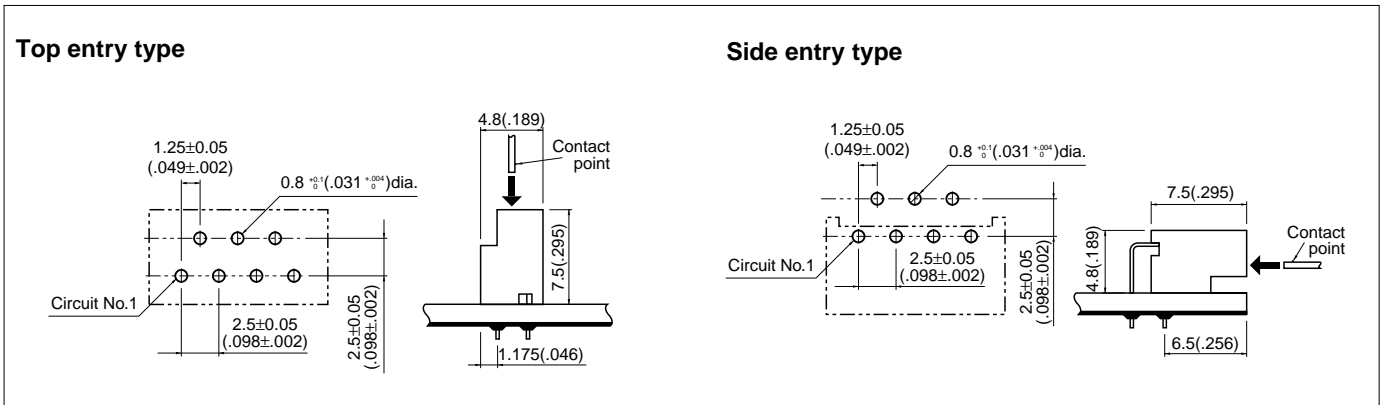

Note: 33 to 40 circuits products are not UL/CSA approved.

FE CONNECTOR

Lead section dimensions of FFC

PC board layout (viewed from component side) and Assembly layout

- Note:
1. Tolerances are non-cumulative: $\pm 0.05\text{mm}(\pm .002")$ for all centers.
 2. Hole dimensions differ according to the kind of PC board and piercing method. The dimensions above should serve as a guideline. Contact JST for details.
