0.5mm and 1mm Pitch, 2.55mm Height FPC/FFC Connectors

FH28 Series

Features

1. Highly reliable connection and robust structure

Multi-polarized connectors, reinforced body structure and high FPC retention produced by the following features: Reliable connection created by its unique FPC/FFC positioning mechanism

Prevents accidental disengagement with the design of its proprietary structure

2. Simplified operations

The flip lock structure makes it easier to engage/disengage the actuator and reduces the required force needed to operate. A clear tactile click is delivered upon the successful completion of the mating process. (Fig.1)

3. Increased FPC/FFC retention force

Vertical retention force for the FPC/FFC is 2.5 times stronger than our 0.5mm pitch connector the FH12 series. Horizontal retention force for the FPC/FFC is 2 times stronger than our 0.5mm pitch connector the FH12 series

*To realize the horizontal retention force values, the use of the FPC positioning tabs are required. FPC without the positioning tabs will comply with the specifications rated on the FH12 series.

4. Accepts standard 0.3mm thick FPC/FFC

It accepts 0.3mm thick products that are easy to manufacture and have superb insertion performance.

5. Fully molded structure aids PCB layout

The bottom of this connector is enclosed by a fully molded structure that protects the contacts and removes any restrictions from PCB patterning and design.

6. Supports automatic pick-n-place mounting

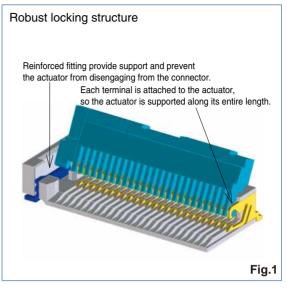

Offered in tape and reel packaging that is compatible with automatic machine mounting. (2,000pcs/reel)

7. Halogen-free

All materials and substances used to produce this product comply with Halogen-free standards.*Defined according to IEC61249-2-21. Br : 900ppm maximum, Cl : 900ppm maximum, Br+Cl : 1,500ppm maximum

8. Multiple packing options

The standard packaging is 2,000pcs/reel, but it is also offered in a 500pcs/reel. (The outer diameter of the reel will be ϕ 330mm in this case.)

The FPC positioning mechanism and FPC tabs help to guide and hold the FPC prior to engaging the actuator

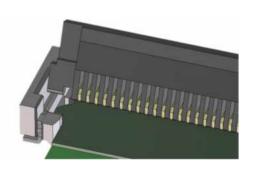

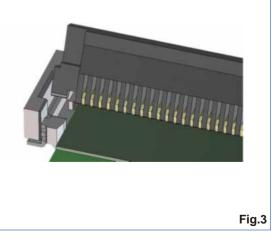

Fig.2

Can also be used with straight sided, non-tabbed FPC/FFC

Product Specifications

Ratings	Rated Current 0.5A (Note 1) Rated Voltage AC 50Vrms	-40 to +105℃ (Note 2) Operating Humidity Range		Storage Temperature Range -10 to +50°C (Note 3) Storage Humidity Range Relative humidity 90% or less (no condensation should be present)	
Adaptive FPC/FFC contact specifications	t= 0.3 \pm 0.05 Gold pl	ating			
Item	Specific	ation		Conditions	
1. Insulation Resistance	Minimum of $500M\Omega$		Measured with I	DC 100V	
2. Withstanding Voltage	No flashover or break	down	AC 150Vrms is	applied for 1 minute.	
3. Contact Resistance	Maximum of 50mΩ *including FPC/FFC	conductor resistance	Measured at 1mA (DC or 1,000Hz)		
4. Durability	Contact Resistance : Maximum of $50m\Omega$ No damaged, cracked or looseness of parts		20 mating cycles		
5. Vibration Resistance	No electrical discontinuity of 1μ s or greater Contact Resistance : Maximum of $50m\Omega$ No damages, cracks and looseness of parts		Frequency : 10 to 55Hz Single amplitude of 0.75mm for 10 cycles in 3 axial directions		
6. Shock Resistance	No electric discontinui Contact Resistance : No damaged, cracked	, , ,	Acceleration of 981m/s^2 , 6ms duaration, sine half-wave waveform 3 cycles in each of the 3 axis		
7. Humidity Resistance of Steady State	Contact Resistance : Maximum of $50m\Omega$ Insulation Resistance : Minimum of $50M\Omega$ No damaged, cracked or looseness of parts		96 hours at temperature : 40°C and humidity : 90 to		
8. Temperature Cycles	Contact Resistance : Insulation Resistance No damaged, cracked		Ω Time : 30 \rightarrow 2 to 3 \rightarrow 30 \rightarrow 2 to 3 minutes		
9. Solder Heat Resistance	Should not have exter parts	nal deformity or loose	Reflow : according to the Recommended Temperature Profile Hand solder: 350 $\pm5^\circ\!C$ for 5 seconds		

Note 1 : When energizing rated current to all contacts, use 70% of rated current.

Note 2 : Includes temperature rise caused by current flow.

Note 3 : The term "storage" here refers to products stored for a long period prior to board mounting and use. The operating temperature and humidity range covers the non-energized condition of connectors after board mounting and the temporary storage.

Materials / Finish

Component	Materials	Color/Finish	Remarks
Inculator	LCP	Gray	UL94V-0
Insulator	LCP	Black	01940-0
Contact	Phosphor bronze	Gold plating	
Metal fitting	Brass	Pure tin plating	

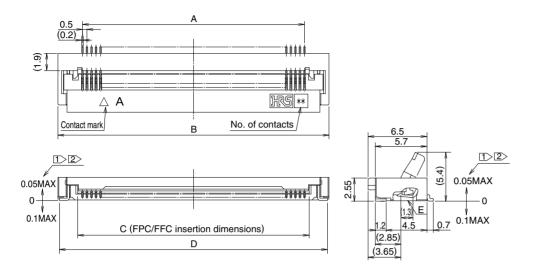

Product Number Structure

Refer to the chart below when determining the product specifications from the product number. Please select from the product numbers listed in this catalog when placing orders.

$\frac{\mathsf{FH}}{\bullet} \begin{array}{c} 28 \\ \hline \bullet \end{array} \begin{array}{c} 1 \\ \hline \bullet \end{array} \begin{array}{c} 50 \\ \hline \bullet \end{array} \begin{array}{c} (25) \\ \hline \bullet \end{array} \begin{array}{c} 5 \\ \hline \bullet \end{array} \begin{array}{c} 8 \\ \hline \bullet \end{array} \begin{array}{c} 0 \\ \hline \bullet \end{array} \begin{array}{c} 0.5 \\ \hline \bullet \end{array} \begin{array}{c} 5 \\ \hline \bullet \end{array} \begin{array}{c} (05) \\ \hline \bullet \end{array}$

Connector Dimensions

[Standard type] 0.5mm pitch product

Notes 1 The coplanarity of the metal fitting and contact is 0.1 MAX.

- $|2\rangle$ The contact lead position shows the dimension from the E surface of the case bottom.
- 3 This product is sold in embossed, tape and reel packaging. For details on this product please refer to the "Packaging Specifications"located on page 9.
- Recesses in part structure may be added to improve molding characteristics. 4 Black marks may appear in the mold resin, but they will not negatively affect the performance of these connectors.
- 5 The color of the plating may change after the reflow process, but it will not negatively affect the performance of these connectors.

● FH28 Series FPC/FFC Material Configuration (Recommended Specifications)

1. Single-Sided FPC

FPC : Flexible Printed Circuit

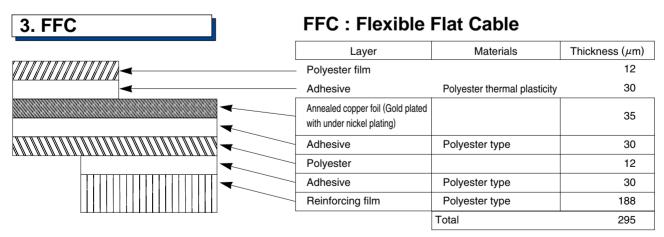

Layer	Materials	Thickness (µm)
Cover lay film	Polymide 1mil	(25)
Cover adhesive		(25)
Surface treatment	Under nickel plating $1 \sim 5\mu$ m+ gold plating 0.2μ m	3
Copper foil	Cu 1oz	35
Base adhesive	Heat stiffener adhesive	25
Base film	Polymide 1mil	25
Stiffener adhesive	Heat stiffener adhesive	30
Reinforcing film	Polymide 7mil	175
	Total	293

2. Double-sided FPC

FPC : Flexible	Printed	Circuit
-----------------------	---------	---------

Layer	Materials	Thickness (μ m)
Cover lay film	Polymide 1mil	(25)
 Cover adhesive 		(25)
Surface treatment	Under nickel plating $1 \sim 5\mu$ m+ gold plating 0.2μ m	3
Through hole copper	Cu	15
Copper foil	Cu 1/2oz	18
Base adhesive	Heat stiffener adhesive	18
Base film	Polymide 1mil	25
Base adhesive	Heat stiffener adhesive	18
Copper foil	Cu 1/2oz	(18)
Cover adhesive	Heat stiffener adhesive	25
Cover lay film	Polymide 1mil	25
Stiffener adhesive	Heat stiffener adhesive	50
Reinforcing film	Polymide 4mil	100
ed FPC to avoid	Total	297

* Remove the copper foil on the back of double-sided FPC to avoid damage due to FPC bending.

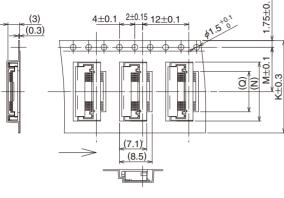

Nominal thickness tolerance is approximately $\pm 20 \mu m$.

- 1. These specifications are an example of the material configuration of an FPC/FFC (t= 0.3 ± 0.05) used on the FH28 series.
- 2. Please contact the FPC/FFC manufacturer for the material configurations of their FPC/FFC.

Packaging Specifications

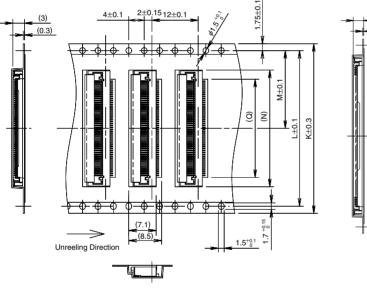

[Common specifications for FH28 Series]

•Embossed Carrier Tape Dimensions (with a maximum tape width of 24mm)

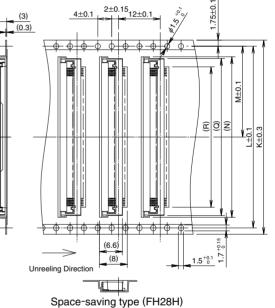

Standard type (FH28, FH28D)

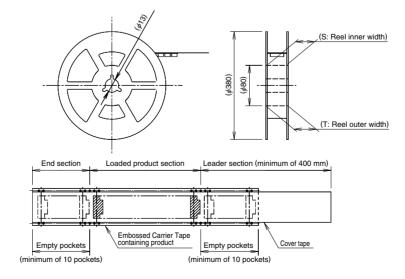

•Embossed Carrier Tape Dimensions (with a minimum tape width of 32mm)

Standard type (FH28, FH28D)

Operation Methods of Connector and Precautions

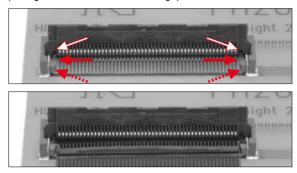

Cautions when mating FFFC/FPC with positioning tabs

1. Position for insertion

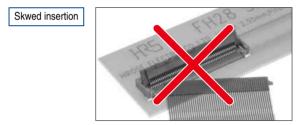

Insert the cable into the gap (\dots) between the side walls (\longrightarrow) on both sides of the cable insertion port' and the 'guide walls (\longrightarrow) on both sides of the inner part of the connector' putting the tab of the cable on the gap.

Operation Methods

2. Cautions during insertion/mating

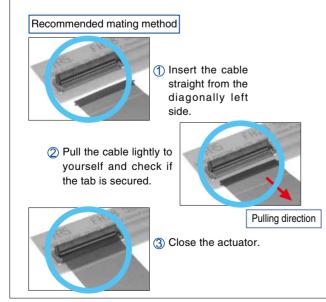

Do not insert the FPC/FFC at an skewed angle (as shown), this type of action may cause the corner of the cable to get hooked and deform its contacts.

Insert the cable straight into the connector opening and hook the cable tab onto the guide.

Pull the cable towards yourself with a slight force after insertion, and close the actuator after confirming that the cable tab is completely secured.

If it cannot be pulled to out, the cable can be determined to be inserted into the correct position.

Precautions for use

2 PC/FFC must not over lap

Do not close the actuator until the FPC/FFC has been placed into its correct position. If it is sitting on the guides and the actuator closes onto it, it can cause damage and alter its performance.
