

HD14536B

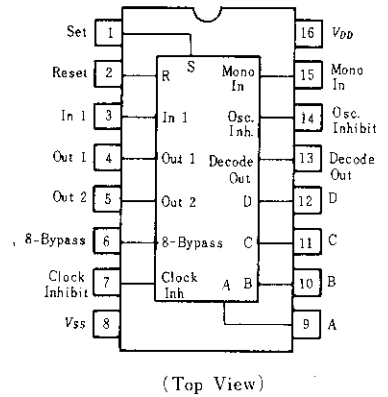

Programmable Timer

The HD14536B programmable timer is a flexible 24-stage ripple binary counter with 16 stages selectable by a binary code. Provisions for an on-chip RC oscillator, or an external clock are provided. An on-chip monostable circuit incorporating a pulse-type output has also been included. By selecting the appropriate output in conjunction with the correct input clock frequency, a variety of timing can be achieved.

FEATURES

- 24 Flip-Flop Stages ... Will Count from 2^0 to 2^{24}
- Last 16 Stages Selectable by Four-Bit Select Code
- Input Allows Bypassing of First Eight Stages
- Set and Reset Inputs
- Clock Inhibit Input
- On-Chip RC Oscillator Provisions
- On-Chip Monostable Output Provisions
- Clock Conditioning Circuit Permits Operation with Very Long Rise and Fall Times
- Clock Input $f_{max} = 3\text{MHz typ. @}10\text{V}$
- Counter Advances On Negative Going Edge of Clock
- Test Mode Allows Fast Test Sequence
- Supply Voltage Range = 3 to 18V
- Capable of Driving One Low-power Schottky TTL Load Over the Rated Temperature Range

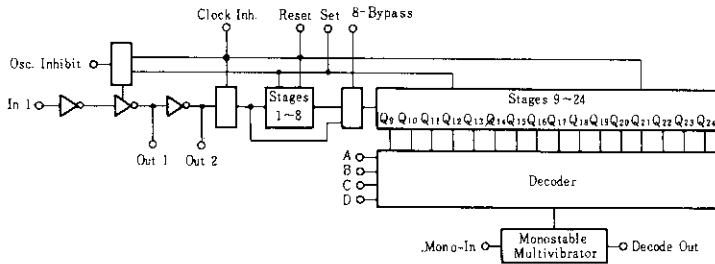

PIN ARRANGEMENT

Cautions

1. Hitachi neither warrants nor grants licenses of any rights of Hitachi's or any third party's patent, copyright, trademark, or other intellectual property rights for information contained in this document. Hitachi bears no responsibility for problems that may arise with third party's rights, including intellectual property rights, in connection with use of the information contained in this document.
2. Products and product specifications may be subject to change without notice. Confirm that you have received the latest product standards or specifications before final design, purchase or use.
3. Hitachi makes every attempt to ensure that its products are of high quality and reliability. However, contact Hitachi's sales office before using the product in an application that demands especially high quality and reliability or where its failure or malfunction may directly threaten human life or cause risk of bodily injury, such as aerospace, aeronautics, nuclear power, combustion control, transportation, traffic, safety equipment or medical equipment for life support.
4. Design your application so that the product is used within the ranges guaranteed by Hitachi particularly for maximum rating, operating supply voltage range, heat radiation characteristics, installation conditions and other characteristics. Hitachi bears no responsibility for failure or damage when used beyond the guaranteed ranges. Even within the guaranteed ranges, consider normally foreseeable failure rates or failure modes in semiconductor devices and employ systemic measures such as fail-safes, so that the equipment incorporating Hitachi product does not cause bodily injury, fire or other consequential damage due to operation of the Hitachi product.
5. This product is not designed to be radiation resistant.
6. No one is permitted to reproduce or duplicate, in any form, the whole or part of this document without written approval from Hitachi.
7. Contact Hitachi's sales office for any questions regarding this document or Hitachi semiconductor products.
