Lead Free Soldering with Weller Tools

Weller®

Why Lead Free?

Based on the global ambitions of pollution prevention, started from July, 1st 2006, the European Community laws request to use only lead free tin for soldering.

Why Weller?

Weller has a long experience with lead free solder. Our customers in Japan and China are successfully working with Weller soldering equipment and lead free solder since many years. The Weller Silver Line technique has proven its quality and performance. Your company should benefit as well from our knowledge and experience.

Particularities of Lead Free Solder

New alloys are needed and in general the melting point is increasing (217°C to 227°C). Compared to lead containing solder, lead free solder joints appear dull and are additionally temperature sensitive during hardening.

An increase of process temperature should be avoided due to longer cooling times may cause micro cracks. Soldering with higher temperatures can result in black layers on the tip which make them unwettable and cause early fallout (charred flux, oxidized tin, tin-iron-fusion). Thus, new materials like lead free alloys demand new tools.

Requirements on Hand-Operated Solder Tools

Due to higher melting points, working with lead free solder requires:

- Tools with better thermal conductivity, to bring the heat lossless to the tip of the iron.
- Optimised tip selection. More short and thick tips are preferable to transfer the needed heat into the solder joint without increasing the process temperature. Thermal stress on components and PCBs are reduced and the solder tip is prevented from damage (lifetime, wettability).
- Cost reduction of wear parts.

Order No.: 005 15 124 99
WDC Dry Cleaner

Hints for Soldering

- Select the working temperature as low as possible.
- Make sure to realize an extensive heat transmission between tip and solder joint thru a well wetted tip.
- Soldering in an inert gas environment increases the flow behaviour and reduces the need of flux; don't use more flux as needed.
- Work with soldering tools that offer high power and a perfect thermal transfer.

- Use an intelligent soldering station with optimised temperature control and setback function to reduce the tip temperature in case of no use.
- Preheat the boards with heating plates before repairing to reduce the soldering time.
- It is recommendable to make sufficient tests and to set-up a detailed flow chart in which steps the changeover to lead free era takes place.

- Clean the tip with the Weller WDC Dry Cleaner.
- Add sufficient tin to the tip before placing the iron into the stand.
- Unwettable tips are reactivated with Weller Tip-Activator.
- Apply as less force as possible onto the tip.
- Black layers of oxidized tips can be softly removed with steel or aluminium wool.

Microprocessor-controlled Soldering
WD 1 / WD 1000 / WD 2

The microprocessor-controlled soldering station WD 1 / WD 1000 is part of a generation of devices which were developed for industrial production technology, including repair and laboratory areas.

The microprocessor-controlled soldering station WD 2 has dual ports. A modern ergonomic design is characteristic for these new Weller stations.
Operation simplicity

- The big LCD display gives clear information and allows simple handling.

- Three fixed temperatures can be assigned with the temperature buttons. You can set the temperatures value as desired.

- The antistatic design of the safety rest of the WD 1000 has got four different settings.

- You can extend the functional diversity of this unit with a USB interface for ISO application for calibration, configuration and precise measured values.
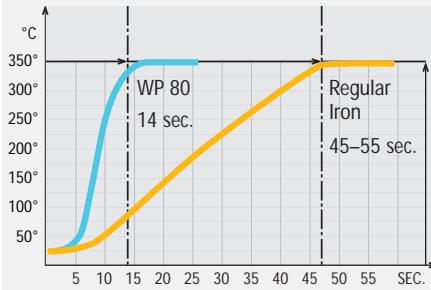

Functionality

The following settings are possible without any accessory unit: custom-designed calibration function, programmable temperature decrease (setback), interlock functions and remote ID for ISO applications.

Quality standard

The manufacturing is based at strictest quality requirements, those guarantee a perfect function of the equipment. Various potential balancing options and an antistatic design of the control unit and soldering tools add to the high quality standard.

Automatic tool recognition

The soldering tools themselves are recognised automatically by the new Weller stations and the corresponding control parameter assigned. This means that re-calibration can usually be avoided.

Additional function of WD 2

The WD 2 has the ability to control two 80 W soldering irons at the same time or one soldering iron of 150 W.

Temperature accuracy

■ Top temperature accuracy and optimised, dynamic temperature behaviour when under stress is achieved by fast and precise measured value recording in the closed control loop.

■ Digital control electronics and high-quality sensor and heat transmission technology in the soldering tool guarantee precise temperature control behaviour at the soldering tip.

Control unit WD 1

Technical data WD 1

Dimensions:	134 x 108 x 147 mm (l x w x h)
Mains voltage:	230 V / 50 Hz
Power input:	95 W
Protection class:	I (control unit)
Temperature control:	150°F – 850°F (50°C – 450°C)
Temperature accuracy:	±17°F (± 9°C)
Temperature stability:	±9°F (± 5°C)
Leak resistance of soldering tip:	< 2 Ω
(Tip to ground)	
Leak voltage of soldering tip:	< 2 mV
(Tip to ground)	

Scope of supply WD 1

- 005 34 006 99   WD 1 Control unit 80 W, 230 V

Multifunction soldering stations WD 1M and WD 2M with High Speed Regulation for Micro soldering tools

The Weller WD 1M and WD 2M Multifunction devices are designed for special soldering tasks in the industrial manufacturing and repair service. The WD 2M control unit has dual outputs. The USB interface allows various ISO applications and the control of the station via external PC.

High Speed Regulation

Characteristic for the electronic soldering stations WD 1M and WD 2M is the additionally included High Speed Regulation. The High Speed Regulation enables the use of the micro tools WMRP and WMRT. In addition further Weller standard tools are applicable.

Operation simplicity

- The big LCD display allows clear information and simple handling.

- Three fixed temperatures can be assigned with the temperature buttons. You can set the temperature value as desired.

Functionality

The following settings are possible without any accessory unit: custom-designed calibration function, programmable temperature decrease (setback), interlock functions and remote ID for ISO applications.

USB interface in series

- The devices are in series equipped with a USB interface. The USB Interface allows exact data logging and various ISO applications.

- There is the possibility of control of the station via external PC.

- The software is available free of charge.

RT soldering tips for WMRP soldering pencil

The RT soldering tips have an extremely short heat-up time (2 – 6 Sec). All component parts of the system, such as the sensor and heating element, are designed for optimum heat transfer. This ensures absolute efficiency in the utilization of the power provided by the supply unit. The recovery time is minimized. Changing soldering tips is quick, easy, and most importantly, requires no tools.

WMRT Micro Desoldering Tweezers for WD 1M, WD 2M

The new WMRT desoldering tweezers enable with their twin parallel adjusted tiplets a significant precise de- and soldering of very small SMD components. The high speed regulation of the stations WD 1M, WD 2M drives these tweezers. Placed in the rest WMRTH the tips are automatically switched off for increasing endurance.

Weller flexibility

Refer to the matrix on page 16 to make your choice of connecting tools for the stations.

LR 82 Antistatic soldering iron

LR 82 set	consists of:		
005 33 113 99	005 26 152 99	LR 82	Soldering iron 80 W, 24 V with soldering tip HT 2
	005 15 027 99	KH 27	Safety rest

An 80 W/24 V soldering iron for high mass soldering. Dual sensor, electronically temperature controlled. LR 82 set, consisting of LR 82 Antistatic soldering iron, KH 27 Support for iron.

WP 80 Micro soldering pencil

WP 80 set	consists of:		
005 29 181 99	005 29 180 99	WP 80	Soldering Iron 80 W, 24 V with soldering tip LT B and barrel short
	005 15 121 99	WDH 10	Comfort safety rest with 4 step varying inclination

The new WP 80 persuades with its short tip-to-grip design, being of big advantage for work under microscopes. The distance from grip to the tip is only 40 mm. (The suitable LT sodering tips on page 17 – 19). WP 80 set, consisting of WP 80 soldering pencil and WDH 10 Support.

WSP 150 Soldering iron

WSP 150 set	consists of:		
005 33 135 99	005 29 170 99	WSP 150	Soldering iron 150 W, 24 V with soldering tip LHT F
	005 15 027 99	KH 27	Safety rest

The WSP 150, 150 W/24 V, soldering iron was specially developed for soldering tasks with extremely high heat requirements. The 150 W heater power combined with optimal transfer of heat to the soldering iron bit guarantee the high performance capability of the soldering iron. WSP 150 set, consisting of WSP 150 Soldering iron, KH 27 Support for iron.

MPR 80 Antistatic Peritronic soldering pencil

MPR 80 set	consists of:		
005 33 131 99	005 29 163 99	MPR 80	Soldering iron 80 W, 24 V Peritronic with soldering tip LT B
	005 15 033 99	KH 25P	Safety rest

An 80 W Antistatic Peritronic soldering pencil that gives all-round vision when making intricate connections. Antistatic cord and handle. Electronically temperature controlled. Consists of MPR 80 Antistatic and KH 25P Support.

WMP Micro soldering pencil

WMP set	consists of:		
005 29 179 99	WMP	WMP	Micro Soldering Iron 65 W, 24 V with soldering tip NT 1
	005 15 122 99	WDH 20	Comfort safety rest

The 65 W micro pencil is up to the task with superior performance for both heat-up and thermal efficiency. Suitable to handle all micro components and fine pitch tasks. The WMP provides an extremely short tip-to-grip distance. The heater is integrated into the handle. When the tip wear out the heating element goes on. WMP set consisting of WMP micro soldering pencil and WPHM holder for WMP.

WMRP soldering pencil for RT soldering tips

WMRP set	consists of:		
005 29 183 99	005 29 171 99	WMRP	Soldering pencil for RT soldering tips
	005 15 145 99	WMRH	rest with stop+go function
	005 44 603 99	RT3	RT3 soldering tip 40 W

The RT soldering tips have an extremely short heat-up time. All component parts of the system, such as the sensor and heating element, are designed for optimum heat transfer. This ensures absolute efficiency in the utilization of the power provided by the supply unit. The recovery time is minimized. Changing soldering tips is quick, easy, and, most importantly, requires no tools. WMRP set, consisting of WMRP soldering pencil, RT 3 soldering tip and WMRH Safety rest.

WST 20 Thermal wire stripper with support

WST 20
005 25 030 99

The WST 20, 50 W/24 V, copes with all known thermoelastic plastics. Adjustable for a stripping length of up to 30 mm. Additional blades available for stripping flat cables and shrinking.

WST 82 Thermal wire stripper with support

WST 82
005 25 031 99

The WST 82 is the 80 W equipment of the WST 20. Adjustable for a stripping length up to 30 mm. Additional blades available for stripping flat cables and shrinking.

WTA 50 Tweezers

WTA 50
005 33 133 99

These tweezers are used to desolder SMD components. The tweezers have two moveable heating elements. WTA 50 set, consisting of WTA 50 Tweezers, AK 51 Support for Tweezers.

WSB 80 Solder bath

WSB 80
005 27 040 99

The WSB 80 is a very useful rework preparation tool. The solder bath is temperature controlled continuously from 50°C to 450°C via an existing 80 W power source. The solder bath can be used to tin wire ends and clean leads of all extraneous solder particles in preparation for reworking. (Usable for lead free solder.)

WHP 80 (80 W/24 V) Preheating plate

WHP 80
005 27 028 99

With a heating surface of 80 x 50 mm, it preheats IC boards prior to micro rework.

WSB 150 Solder bath

WSB 150
005 27 042 99

The WSB 150 solder bath is optimally suited to tin coating and preparation of soldering components. It has a temperature range of 50°C–550°C with heat output of 150 W, making the WSB solder bath an ideal accessory to the Weller WSD 150 soldering station. To guard against dripping solder residue, the solder bath is placed in a V2A tray, supplied as an optional extra. (Usable for lead free solder.)

Round sloped 45° slim					
LT 4	Round sloped 45° slim	Ø 1,2 mm		15,0 mm	005 44 421 00
Round sloped 45°					
LT F	Round sloped 45°	Ø 1,2 mm		13,5 mm	005 44 408 00
Round sloped 45° long					
LT BB	Round sloped 45° long	2,4 mm	4,0 mm	18,0 mm	005 44 444 00
LT CC	Round sloped 45° long	3,2 mm	6,0 mm	18,0 mm	005 44 445 00
Concial long					
LT 1L	Concial long	Ø 0,2 mm		26,4 mm	005 44 423 99
LT S	Concial long	Ø 0,4 mm		21,0 mm	005 44 406 99
Conical long bent					
LT 1LX	Conical long bent	Ø 0,2 mm		26,4 mm	005 44 424 99
Gull wing 45°					
LT GW	Gull wing 45°	Ø 2,3 mm	3,2 mm	18,8 mm	005 44 410 00
Measuring tip					
LT	Measuring tip for thermo element	Ø 0,5 mm		13,0 mm	005 44 416 00
Screw in tip					
LT	Screw in tip with M4 outside thread			8,0 mm	005 44 449 99

Soldering Tips for high melting solder WP 80, WSP 80, FE 75 and MPR 80
Model	Description	Width A	Thickness B	max. Length L	Order No.
Chisel					
LT HHPB	Chisel •	0,8 mm	0,4 mm	13,5 mm	005 44 430 99
LT AHPB	Chisel •	1,6 mm	0,7 mm	13,5 mm	005 44 431 99
LT BHPB	Chisel •	2,4 mm	0,8 mm	13,5 mm	005 44 432 99
LT DHPB	Chisel •	4,6 mm	0,8 mm	13,5 mm	005 44 483 00

• HPB solder = solder with high consumption of lead for special high melting applications

Barrel for soldering iron WP 80 for quick exchange of hot soldering tips
Order No.: 005 87 448 46
barrel long 55 mm

Order No.: 005 87 448 45
barrel short 40 mm

NO!

OK.
