## Hex Inverter

The TC74AC04 is an advanced high speed CMOS INVERTER fabricated with silicon gate and double-layer metal wiring $C^2MOS$ technology.

It achieves the high speed operation similar to equivalent Bipolar Schottky TTL while maintaining the CMOS low power dissipation.

The internal circuit is composed of 3 stages including buffer output, which provide high noise immunity and stable output.

All inputs are equipped with protection circuits against satic discharge or transient excess voltage.

## Features
