FPB-RA2E1 Fast Prototyping Board

1. Introduction

The FPB-RA2E1 Fast Prototyping Board provides an entry point for evaluation, prototyping and development with the RA2E1 MCU. Moreover, since this board incorporates an emulator circuit, you can use it for designing your own applications without needing to make further investments in tools. This product includes through-holes for pin headers that allow access to all MCU signal pins, allowing easy prototyping with a breadboard.
