

# Device Modeling Report

COMPONENTS: BIPOLAR JUNCTION TRANSISTOR  
PART NUMBER: 2SC2482  
MANUFACTURER: TOSHIBA

**Bee Technologies Inc.**

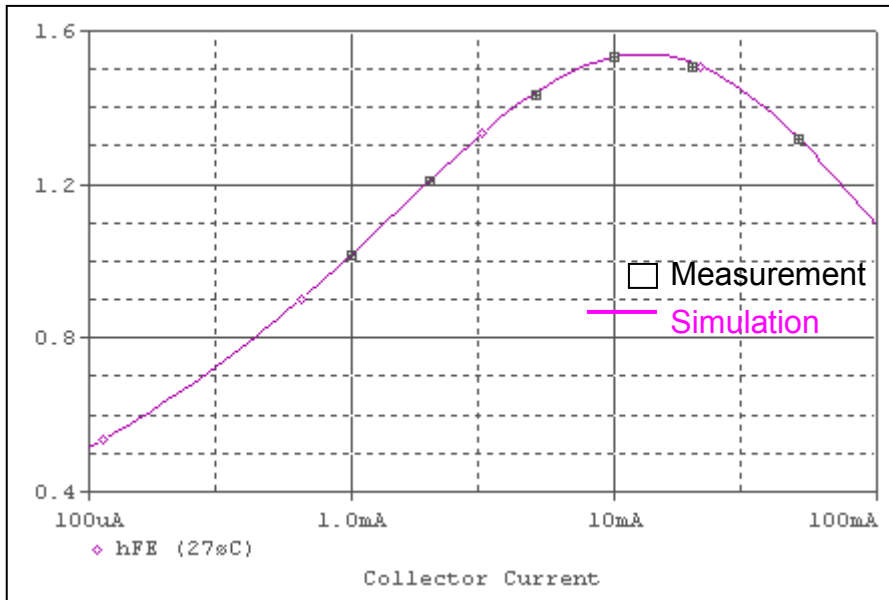

| Pspice model parameter | Model description   |
|------------------------|---|
| IS                     | Saturation Current  |
| BF                     | Ideal Maximum Forward Beta                                  |
| NF                     | Forward Current Emission Coefficient                        |
| VAF                    | Forward Early Voltage                                       |
| IKF                    | Forward Beta Roll-off Knee Current                          |
| ISE                    | Non-ideal Base-Emitter Diode Saturation Current             |
| NE                     | Non-ideal Base-Emitter Diode Emission Coefficient           |
| BR                     | Ideal Maximum Reverse Beta                                  |
| NR                     | Reverse Emission Coefficient                                |
| VAR                    | Reverse Early Voltage                                       |
| IKR                    | Reverse Beta Roll-off Knee Current                          |
| ISC                    | Non-ideal Base-Collector Diode Saturation Current           |
| NC                     | Non-ideal Base-Collector Diode Emission Coefficient         |
| NK                     | Forward Beta Roll-off Slope Exponent                        |
| RE                     | Emitter Resistance  |
| RB                     | Base Resistance   |
| RC                     | Series Collector Resistance                                 |
| CJE                    | Zero-bias Emitter-Base Junction Capacitance                 |
| VJE                    | Emitter-Base Junction Potential                             |
| MJE                    | Emitter-Base Junction Grading Coefficient                   |
| CJC                    | Zero-bias Collector-Base Junction Capacitance               |
| VJC                    | Collector-base Junction Potential                           |
| MJC                    | Collector-base Junction Grading Coefficient                 |
| FC                     | Coefficient for Onset of Forward-bias Depletion Capacitance |
| TF                     | Forward Transit Time  |
| XTF                    | Coefficient for TF Dependency on Vce                        |
| VTF                    | Voltage for TF Dependency on Vce                            |
| ITF                    | Current for TF Dependency on Ic                             |
| PTF                    | Excess Phase at $f=1/2\pi*TF$                               |
| TR                     | Reverse Transit Time  |
| EG                     | Activation Energy   |
| XTB                    | Forward Beta Temperature Coefficient                        |
| XTI                    | Temperature Coefficient for IS                              |

# Reverse

## Reverse Early Voltage Characteristic

## Reverse DC Beta Characteristic (Ie vs. hFE)

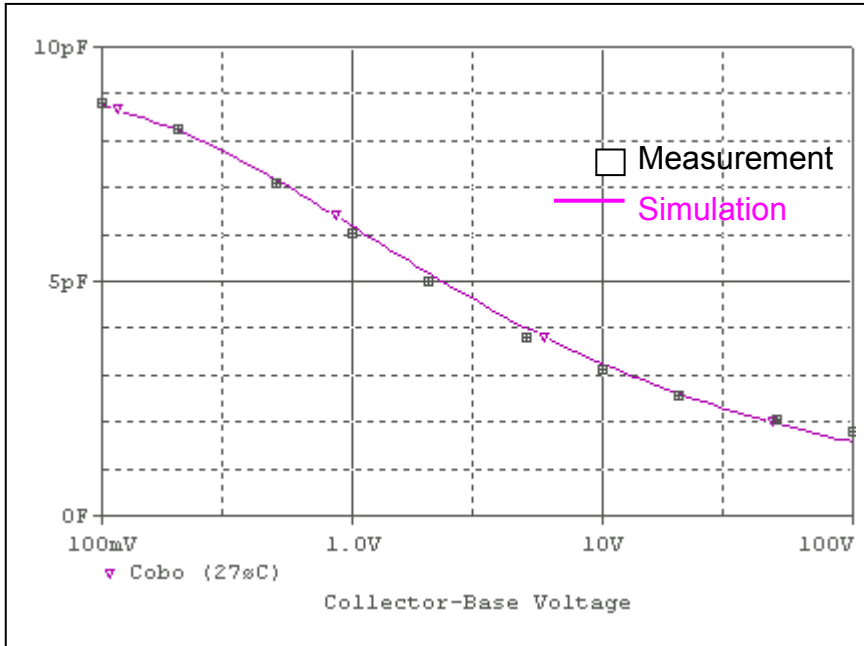

# Forward

## Forward Early Voltage Characteristic

## C-B Capacitance Characteristic

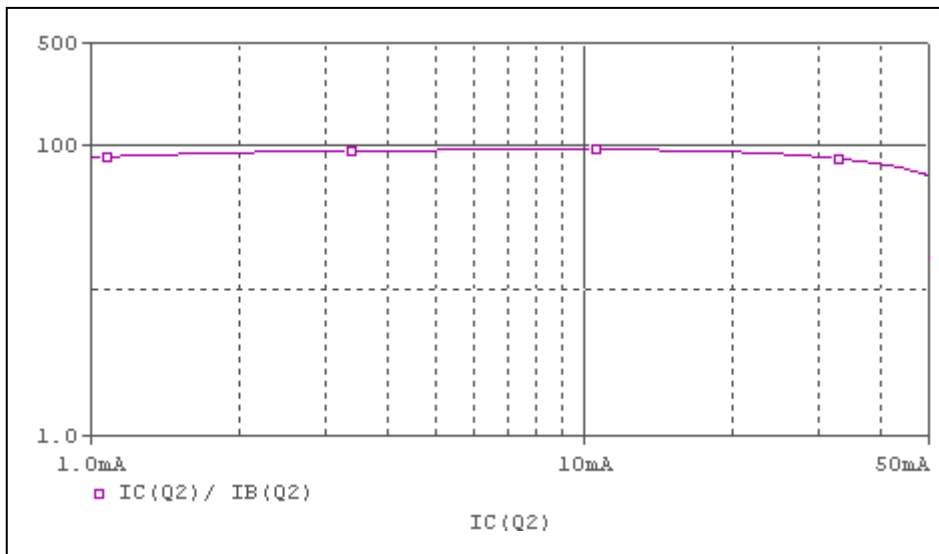

## E-B Capacitance Characteristic

## BJT Ic-hFE characteristics

### Circuit simulation result

### Evaluation circuit

## Comparison Graph

Circuit simulation result

Simulation result

| $I_c$ (A) | hFE         |            | %Error      |
|-----------|-------------|------------|-------------|
|           | Measurement | Simulation |             |
| 0.001     | 83.33       | 82.309     | 1.22524901  |
| 0.002     | 86.957      | 87.216     | 0.297848362 |
| 0.005     | 90.567      | 91.57      | 1.1074674   |
| 0.01      | 91.924      | 92.582     | 0.715808712 |
